

Training

SDMO France

The role of the SDMO training department in Brest is to pass on to our distributors and customers the knowledge needed to use and maintain our generating sets. During training courses, run mainly on our site in Brest (France) by fully trained professionals simulators are used to recreate various configurations, using innovative or more classic technologies. Our training course programmes are organised by theme and by level to ensure they are suited to each individual. Every year, SDMO's training department runs over 2200 days of training and receives nearly 750 trainees*.

The Training programmes are held January to March and September to November. See attached calendar

For more information go to www.sdmo.com **services** and email formation@sdmo.com or

Contact: Simon Bailey – SDMO Byfleet - simon.bailey@sdmo.co.uk

* The SDMO training centre is an accredited body, allowing companies to attribute their training fees to their training budget.

SDMO Energy UK

Local training courses are held in the UK for Nexys, Telys, TSI and Verso control panels. The course can be tailored for the needs of your company. For more information contact : Shirley Cooke
